Vehicle Control unit

NOTES

Information on preventing damage to electronic components due to electrostatic discharge :
 - The safety information and descriptions listed in Help (F6) MUST be observed. ⚠

General test conditions :
 - Use only cable with fuse for bridges.
 - Each time after replacing a component, always carry out a test.
 - A component test should be carried out in order to confirm the fault.
 - When processing a fault code, a fault code may be cleared.
 - This step may temporarily result in other fault codes.
 - Only generate counterfault by short circuit and open circuit.

Safety note :
 - Pay attention to the safety notice 'AS 58.40-Z-0001'.

General information :
 - The data read out of the control units refer to specific events or system statuses and serve as a basis for narrowing down the source of the defect. The data may include a tolerance and it may therefore not necessarily be possible to link them to a certain event, location or time.
